Basic Sales Summary – Excel Project

Task: 14 | **Level:** 1 – Day 14

Project Overview

This beginner-friendly Excel project summarizes sales data and calculates three key performance indicators (KPIs): total sales, average sales, and transaction count.

Tools Used

Microsoft Excel

Dataset

Product	Quantity	Sales
Laptop	10	50000
Mobile	15	30000
Keyboard	20	10000
Mouse	25	7500
Monitor	8	24000
Headphones	12	12000
Tablet	5	25000
Printer	4	16000
Webcam	10	8000
Speaker	6	9000

Formulas Used

Total Sales: =SUM(C2:C11) → 191500

Average Sales: =AVERAGE(C2:C11) → 19150

Transaction Count: =COUNT(C2:C11) → 10

Key Learnings

• Organized sales data into columns.
• Used SUM, AVERAGE, and COUNT formulas.
• Created a separate Summary sheet to present the KPIs.

Conclusion

The project demonstrates basic Excel data summarization skills and provides a quick overview of sales performance.
